(54) COMMUNICATIONS TERMINAL

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a communications terminal that rewrites a control program at a low cost with easy operation.

SOLUTION: In the communications terminal, a control program is stored in a flush memory 13 and a socket 16 is provided, in/from which an EPROM 21 storing a write program to rewrite the control program stored in the flush memory 13 and storing a control program written in the flush memory by the write program is loaded/unloaded.

LEGAL STATUS

[Date of request for examination] 16.06.1999

[Date of sending the examiner's decision of rejection] 23.01.2001

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
